73rd Annual Convention . . . Workshops, Symposiums, Exhibits

Calcium

balanced with

Magnesium

Phosphorus

Dextrose

900cc.

CALMORTM

Increased volume is a significant factor in success of the CALMOR formulation. There is less renal spill-over, less strain on laboring heart, yet more calcium to treat the metabolic upset. Result: Treatment is surer; the cow stays up; return calls are reduced. The addition of d-glucose to the formula provides a ready source of energy to treat those animals in which an incipient ketosis complicates the milk fever.

SUPPLY: CALMOR is now available at CS veterinary supply outlets in cartons of 12 easy-grip plastic bottles with re-usable bails.

The bottle openings are sized for Simplex or Simplicity IV tube. Volume is 900 cc. The cost, surprisingly low.

President's Message

It is with a great deal of pleasure that I extend a cordial invitation to you and your wife to attend the 73rd annual meeting of the California Veterinary Medical Association in Long Beach, October 23-25.

This year's convention has been scheduled in October to avoid conflict with the normally busy schedule a veterinarian experiences throughout the summer months when we held previous conventions. We hope this change will prove popular with California's veterinarians and we hope to see this reflected in a record attendance this year.

Under the direction of Dr. W. W. Putney, program chairman, and members of his committee, an outstanding program has been planned. The number of exhibits to be shown has proved most gratifying and we urge all practitioners and guests to visit the many booths which will feature the latest in drugs and equipment.

I also urge that every member plan to attend this year's important House of Delegates meeting on Sunday, October 22. As our association grows in size it becomes increasingly imperative that we take an active part in its affairs.

The City of Long Beach and the staff of the Lafayette Hotel have been most cooperative in providing for your comfort and I am sure your stay in Long Beach will prove to be a pleasant and memorable one.

The ladies have an excellent program planned under the direction of Mrs. A. Mack Scott and her co-chairman, Mrs. R. R. Smith, so I hope you will plan to bring your wife.

Business will be mixed with pleasure in the form of some outstanding social events for husbands and wives. Disneyland and Marineland are only minutes away from the convention center by freeway.

Convention time provides a wonderful opportunity for colleagues who haven't seen each other during the past year to get together once again and discuss mutual problems. For some of our newer practitioners this convention will provide us with the means to get to know them better.

The Executive Committee joins the program committee in welcoming you to our 73rd annual convention. We think you will enjoy it and I hope to see you there.

Sincerely yours,

E. R. BRAUN, D.V.M., *President*

LONG BEACH, 1961

From the tall towers of the Signal Hill oil fields to sandy, sun swept beaches, the city of Long Beach is rapidly becoming one of California's favorite convention cities.

California's veterinarians will sample Long Beach hospitality when they meet for the 73rd annual CVMA convention at the Lafayette Hotel, October 23-25.

But Long Beach was not always the bustling metropolis that it is today. In the late 1880's the community consisted of nothing more than temporary shacks and tents.

It wasn't until oil was discovered at Signal Hill in 1921 that Long Beach practically doubled its population of 50,000 overnight. Oil production, refining and sales became one of the city's leading activities and migrants from the East swarmed into the area hoping for a lucky find.

Subsequent oil discoveries in the Long Beach area have kept the petroleum industry high on the list of economic interests giving Long Beach one of the highest per capita wealth ratings in the United States.

Long Beach possesses an excellent harbor which attracts ships from all over the world and shelters a large commercial and sport fishing fleet.

Belmont Pier and Pierpont Landing are popular spots for the pier fisherman and the

waters off Long Beach abound with albacore, yellowtails, bluefin tuna and white sea bass for the deep sea fisherman.

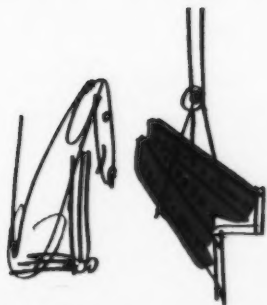

For those attending the CVMA Long Beach convention with their children, they will find that such world-famous attractions as Disneyland, Knott's Berry Farm, Catalina Island and Marineland are all less than an hour's ride from the headquarters hotel.

And for those who just like to relax on sandy beaches and watch the breakers roll in, the beach is only three blocks away from the Lafayette Hotel.

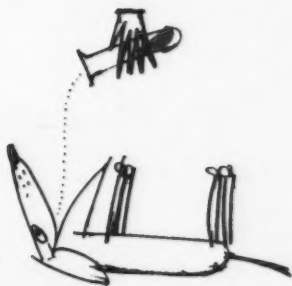

The gourmet will find excellent charcoal broiled steaks at the Ivanhoe Room in the Lafayette Hotel and at the Apple Valley Steak House one block from the hotel, and for dancing there's the Sky Room of the Wilton Hotel, Long Beach's answer to San Francisco's "Top of the Mark."

Long Beach, the "Queen of the Beaches" welcomes California's veterinarians to their 1961 convention. Every effort is being made to make your stay there a pleasant one. We hope that you will attend what promises to be one of the best CVMA conventions in years.

THE CALIFORNIA VETERINARIAN

1. Most hematinics contain iron. 'Vi-Sorbin' contains ferric pyrophosphate: rapidly absorbed and well tolerated.

2. Most hematinics contain vitamins. 'Vi-Sorbin' contains vitamin B₁₂ and folic acid for mutually enhanced erythropoietic activity and appetite stimulation. The addition of B₆ insures against a deficiency of this vitamin in cases of anorexia.

3. 'Vi-Sorbin' is the hematinic that contains B₁₂ and D-Sorbitol (patented). D-Sorbitol overcomes the B₁₂ absorption barrier which keeps ordinary hematinics from functioning properly. It is completely stable and has a pleasing flavor for dogs and cats.

4. Vi-Sorbin:

CVMA Convention, Long Beach

Disneyland Is Nearby

"Mommie, can we go to Disneyland? Can we?," is probably a familiar cry to many parents but you will probably hear it again when you and the family attend the CVMA's 73rd annual convention in Long Beach in October.

Located in Anaheim, Disneyland is less than an hour's drive away from the Lafayette Hotel, convention headquarters, over Carson Boulevard or Seventh Street.

Nearby you'll find Knott's Berry Farm with its ghost town atmosphere and delicious chicken dinners.

Parents and youngsters alike discover a never-ending display of wonders at Walt Disney's fabulous playgrounds regardless of how many times they have visited Disneyland.

Trips through make-believe jungles, Tomorrowland, Fantasyland, with its fairy-tale landscape, and many other wondrous adventures await visitors to this southern California landmark.

If you or your children have never visited Disneyland the CVMA Long Beach convention should provide you with an ideal opportunity.

Hotel Lafayette

THE CALIFORNIA VETERINARIAN

W. W. PUTNEY

Greetings...

Welcome to the 73rd annual convention of the California Veterinary Medical Association. This year's Program Committee has planned what we believe to be a most interesting and enjoyable three-day meeting at the Lafayette Hotel in Long Beach.

This year we will feature a small animal program including the highly successful small animal workshops, inaugurated last year.

Our large animal program will feature separate symposiums on equine and bovine practice.

Speakers for this year's program will come from as far away as Florida, Ohio, Maryland and New York to bring you the latest in medical research and surgical techniques.

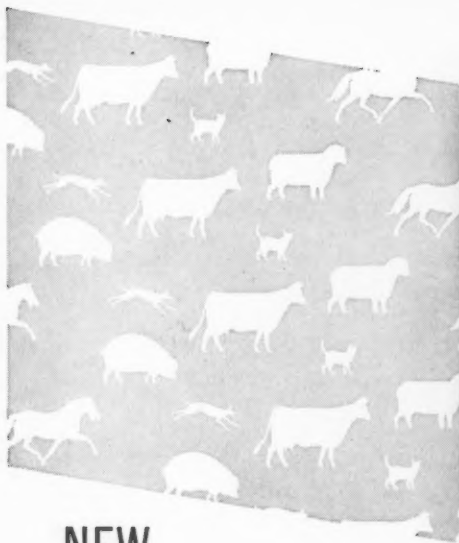

Every effort has been made to give you the best possible program, conducted by some of the nation's leading veterinary medical authorities.

The Women's Auxiliary has planned a well rounded program for the ladies which includes an Auxiliary workshop, installation luncheon and harbor cruise. Other social events planned for both men and women include an original Hawaiian luau, installation dinner-dance and a golf tournament.

This year's response from exhibitors has been most gratifying and we feel you will be delighted with the many attractive booths. Our exhibit area is centrally located in the convention hotel and I urge you to visit and chat with our friends in the pharmaceutical business.

We think you will find this year's convention both an enlightening and enjoyable experience. Your presence and participation can contribute towards making this the most successful convention in the history of our association.

W. W. PUTNEY,
Program Chairman

DEHYDRATION ?
MALNUTRITION ?

TISSUE DEPLETION ?

NEW

for large animals for small animals

ARLIVITE®

parenteral amino acids, glucose, B vitamins

- Replaces lost fluid volume in dehydrated animals
- Combats debilitating effects of diarrhea, distemper, dystocia, enteritis, mastitis, parasitism
- Corrects hypoglycemia, provides energy, prevents diversion of protein for caloric needs
- Provides immediately available amino acids for rapid repair of depleted tissue
- Replenishes body stores of B vitamins, restores appetite
- Corrects suboptimal performance due to low serum protein levels

Indicated as part of the treatment of disease, before and after surgery, and whenever the state of nutrition appears poor. Available in individual 250 cc. bottles as a desiccated powder to be reconstituted with sterile water, normal saline, additional glucose or fructose solution.

To Our Exhibitors—

Thank You!

Over 50 displays of manufacturers' products will be exhibited at this year's CVMA convention in Long Beach. The exhibits will feature the latest in veterinary pharmaceuticals, biologicals, equipment and instruments.

The exhibit area promises to be the busiest place in the Lafayette Hotel since it not only serves as a products display area but also contains the delegates registration booth.

In addition many activities will center around the area including several drawings, a free buffet luncheon and the serving of free coffee and soft drinks during the three-day meeting. Conference rooms are located adjacent to the exhibit area.

Every effort has been made to give doctors ample opportunity to become acquainted with the exhibitors and their products and the exchange should prove mutually beneficial.

President

President's Message

It is my pleasure on behalf of the Women's Auxiliary to the California Veterinary Medical Association to invite the wives of all veterinarians to attend the State Convention in Long Beach where the sparkling California sunshine is cooled by the ocean breeze, making it a tropical paradise.

With the women of Southern California as our hostesses, especially under the leadership of our Claire Scott, you may be sure that the entertainment will be lovely and unusual. You may even be the lucky one who will be going home with a fabulous fur of your choice.

The annual business meeting is a necessary part of our Auxiliary and it is scheduled so as not to interfere with the many pleasant things you will find to do. Come join us for a cup of coffee and find out what we are trying to do for the benefit of the veterinary profession.

Mrs. Russell P. Cope

WOMEN'S PROGRAM

Monday, October 23

10:00 A.M.—Complimentary Brunch, Business Meeting, Lafayette Hotel.

Tuesday, October 24

10:30 A.M.—Board the "Princess," showboat for the Ports 'o Call Restaurant; Luncheon; Entertainment; Installation of Officers.

2:00 P.M.—Board "Princess" for return trip.

Wednesday, October 25

10:00 A.M.—Auxiliary Workshops, Lanai Room, Lafayette Hotel.

The Lanai Room will be available for use to all Auxiliary Members. Registration (\$5.00) covers all activities. Please pre-register with your husband.

* * *

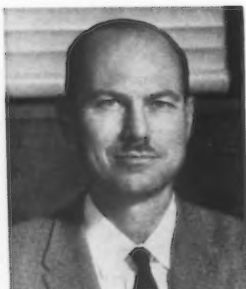

Southern California's only sea-going paddlewheel boat, the S.S. *Princess*, will play an exciting part in the Women's Auxiliary program for the CVMA's annual convention in Long Beach.

The ladies will board the vessel at The Reef restaurant for a trip to the Port of Los Angeles as a part of the three-day program being planned for delegates' wives to the 73rd annual convention.

The huge Long Beach harbor offers a spectacular setting for the quaint sidewheeler chugging through the smooth waters of the bay and you will be able to see some of the world's largest merchant ships and Navy vessels riding at anchor nearby and enjoy the wide panorama of the Long Beach skyline.

The *Princess* is a replica of an old Mississippi River showboat complete with Can-Can waitresses serving buffet dinners, Silver Dollar bar and Gay '90's decor. The spacious main lounge is large enough for dancing and a cut-away section is featured where you can actually see the paddlewheel in operation.

CONVENTION SPEAKERS

ELLIS P. LEONARD

Dr. Ellis P. Leonard was born in New Jersey and received his B.Sc. degree from Rutgers University in 1929. In 1934 he earned his D.V.M. degree from Cornell University, and after a year of practice he went to Kansas State University to teach in the department of surgery and medicine. In 1937 he practiced in Summit, N.J. Eleven years later he became head of the department of Small Animal Medicine and Surgery, and director of the Small Animal Clinic at the New York State Veterinary College, Cornell University, the position he now holds. He has published a number of articles on small animal medicine and surgery; was co-author of "Canine Medicine" and "Artificial Insemination of Farm Animals." Another book, "Orthopedic Surgery of the Dog and Cat," was published in 1960.

EDWARD A. TRABIN

Edward A. Trabin, B.S., LL.B., C.P.A., is a practicing attorney in Los Angeles. He is a member of the State Bar of California, Los Angeles County Bar Association, Harvard Law School Association and Ionic Masonic Lodge. Upon graduation from Law School, Mr. Trabin was appointed a Teaching Fellow in Law at Harvard Law School, 1955-56. He was admitted to practice before the Massachusetts Bar in 1955, and became a member of the California Bar in 1957. He was on the faculty of the extension division of the University of California, Los Angeles, and lectured on tort law as well as elementary and advanced tax accounting. He is the attorney for the Southern California VMA, and a regular contributor to the *Pulse*, the monthly bulletin of the SCVMA.

ROBERT P. KNOWLES

Dr. Robert P. Knowles received his D.V.M. degree from Auburn University in 1944. He is presently engaged in small animal practice in Miami; is a research instructor in the department of experimental surgery at the University of Miami School of Medicine, and is an active member of the research staff of the Variety Children's Research Foundation. He has served as president of the South Florida Veterinary Society; secretary and president of the Florida State VMA, and is currently president-elect of the AAHA. He has authored or collaborated on numerous articles in veterinary literature on general surgery, orthopedic surgery, diagnostic procedures, and various phases of hospital management. He also authored three chapters in veterinary text books on allergy, inhalation therapy and anesthesia.

WILLIAM R. MCGEE

Dr. William R. McGee was born in 1917 and raised in Western Montana. He received his B.Sc. and D.V.M. degrees from Washington State College in 1939-40. He passed the California State Board examinations in 1940, but went to Kentucky to practice. He worked as associate veterinarian with Hagyard and Hagyard in Lexington, and in 1947 the partnership of Hagyard, Davidson and McGee was organized. He confines his practice entirely to breeding farm operation, including broodmares, foals, yearlings and stallions. Representing and acting for owners and syndicates in the purchase of breeding stock in this country, England, Ireland, France and Italy has been part of this work. He is also a consultant in Canada, Mexico and South America.

CONVENTION SPEAKERS

S. F. ROSNER

Dr. S. F. Rosner received his D.V.M. degree from Kansas State University in 1940, after which he became engaged in private practice in Missouri and Illinois for seven years. He was also associated in small animal practice in California for about six months in 1947. In December of the same year, he became associated with Allied Laboratories, which, since January, 1961, is a Division of the Dow Chemical Company. At the present time, Dr. Rosner is a Field Veterinary Representative, engaged in consultation, field evaluation studies for the Virus Research Department, and special sales detailing.

W. R. PRITCHARD

Dr. W. R. Pritchard received his D.V.M. degree from Kansas State University in 1946, a Ph.D. from the University of Minnesota in 1953, and a J.D. from Indiana University in 1957. After a short period of private practice he joined the staff of the University of Wisconsin. Later he became head of the Division of Veterinary Medicine and Clinics, University of Minnesota, and in 1953 was in charge of cattle disease research at Purdue. In 1957 he went to the University of Florida as Head, Dept. of Veterinary Science. Since August 1, this year, he has been Associate Director, Veterinary Medical Research Institute, Iowa State University. He has been consultant to the Rockefeller Foundation, National Academy of Science, Department of Agriculture and the Department of Defense.

DR. CHARLES S. CRANE

Dr. Charles S. Crane's practice has embraced every facet of the profession at one time or another. He received his D.V.M. degree from Colorado A. & M. in 1944, and is presently engaged in general practice in Porterville, California. He is a member of the AVMA, CVMA and the Tulare County VMA. Dr. Crane has served on various committees of the CVMA, and has contributed papers to the *California Veterinarian* in the past.

JOHN D. GADD

Dr. John D. Gadd received his D.V.M. degree from the University of Pennsylvania in 1932, and has been in practice since then. During the years he has specialized in large animal practice, chiefly equine. He is a member of the American Animal Hospital Association, and a member of their committee on general surgery. He has contributed to programs in both small animal and large animal sections on surgery. Dr. Gadd has authored papers on both large and small animal surgery and medicine. He is a past president of the University of Pennsylvania Veterinary Alumni Society; past president, Medical Veterinary Association of Maryland, and past president, Southern Veterinary Medical Assn. He is a past member of the House of Delegates, AVMA, and chairman of their Special Committee of Foreign Veterinary Graduates.

V. G. CRAGO

Dr. V. G. Crago graduated from Ohio State University in 1942. During the four years following he was engaged in large animal practice in Kinsman, Ohio. In 1946 he established his small animal practice in Youngstown, Ohio. Dr. Crago is one of the featured speakers in the WORKSHOP section of the CVMA's 73rd annual meeting, and his subjects will include "Records Used in Clinic Type Practice," "Advantages of Clinic Type Practice," and "Management of the Ambulatory Patient."

EQUINE and BOVINE SECTIONS

- 9:00—Question and Answer Panel. Co-chairmen—F. M. Brennan and A. H. Edmondson.

Participants—W. R. Pritchard, S. F. Rosner, Charles S. Crane, R. Scott Jackson, John D. Gadd and William R. McGee.

HAWAII LUAU TO HIGH

The colorful Polynesian Luau area of the Reef Restaurant where "something different" is offered in group entertaining.

The blue sky of Hawaii is a long way from the golden hills of California but CVMA convention delegates will experience a pleasant blending of both when they arrive in Long Beach, October 23-25.

The occasion will arise on Monday evening, October 23, when CVMA delegates and wives are invited to a gigantic Hawaiian luau at the famous Reef Restaurant. You may have trouble reading your menu since The Reef puts on their luau in true Hawaiian style, complete with menu printed in Hawaiian. But the gourmet should have no trouble in recognizing such delicacies as roast pig, chicken with long rice, Hawaiian salmon, sweet and sour fried ribs, steamed crabs, sea weed relish and coconut pudding.

The Reef Restaurant is located on South Harbor Scenic Drive at the Port of Long Beach. It is only a five minute drive from the

Lafayette Hotel, convention headquarters. With its thatched roof, beautiful tropical foliage, glistening pools of water and true South Sea island hospitality, CVMA delegates and wives are sure to enjoy themselves. With the skyline of Long Beach and its famous harbor in the background, The Reef will provide a memorable setting for a night to remember.

The Reef is one of the most experienced restaurants on the mainland for producing a luau. They boast of being the first restaurant in southern California to build a luau grounds and with their sister restaurant Ports o'Call offer one of the most extensive Hawaiian menus.

Be sure you reserve Monday evening, October 23 as the date you and your wife will attend this original Hawaiian luau. We think you'll enjoy it.

HIGHLIGHT CONVENTION

Right: Skilled Chefs at The Reef prepare one of the succulent repasts featured at the Luau.

Below: Entertainment includes a one-hour floor show with dancing girls, Hilo Hatties, fire dancer and knife thrower—all in the Polynesian atmosphere.

Dean Emeritus E. E. Wegner, School of Veterinary Medicine, Washington State University, will install the officers for 1961-62.

Radio-TV Scripts Available

A radio-television script on the rabies problem in California is now available to local associations for use in conjunction with rabies vaccination clinics.

The script is suitable for a 15-minute public service interview or panel presentation.

Topics included are approached on an elementary level designed to acquaint the public with the disease and what they can do about eliminating it.

Copies may be obtained by writing the California Veterinary Medical Association, 3004 16th St., San Francisco 3.

News From Our Members

Dr. R. L. Collinson, formerly of Modesto, has now leased the Alta View Veterinary Hospital at 4747 El Camino Real, Los Altos, Calif.

* * *

Dr. W. B. Wetmore, formerly employed by the Modesto Veterinary Hospital, has leased the McHenry Veterinary Hospital in Modesto from Dr. R. L. Collinson.

* * *

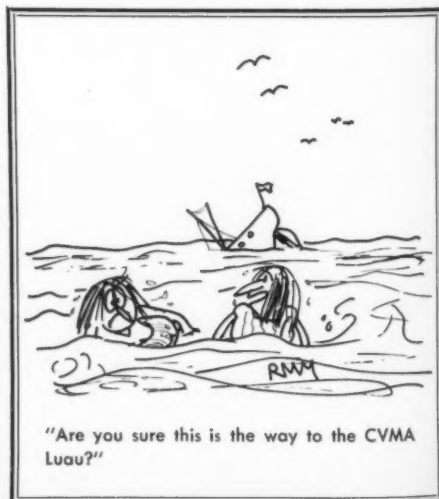

Dr. Richard Ryno has purchased Dr. C. R. Clinkenbeard's hospital at Willows, Calif. Dr. Clinkenbeard is now practicing in Redding, Calif.

* * *

Dr. Kenneth Cramton, formerly employed by the Marina Pet Hospital in San Francisco, has opened a new animal clinic at 1480 Stone Valley Road, Alamo, Calif.

* * *

Dr. Robert M. Lochtie, formerly employed with the State of California, has purchased Dr. J. D. Lindenmayer's hospital in Eureka. Dr. Lindenmayer is now employed in regulatory work by the government.

CVMA Golf Tournament

Dig out that golfing cap and oil up your irons because it won't be long before it's CVMA convention time and the annual golf tourney.

This year's golf tournament will be held Sunday, October 22, at the Huntington Beach Golf Course. Tee off time is at noon. Transportation will be arranged from the Lafayette Hotel, in Long Beach, leaving at 11 a.m. Lunch will be served at the Golf Course.

There will be prizes galore given away to those who qualify. These include the CVMA Low Gross trophy; the SHOR-LINE trophy for low net; the Charles S. Travers trophy for low net based on club established handicaps; the Jen-Sal trophy for ladies low net and the CVMA Executive Secretary's trophy for exhibitors with low net. All trophies are perpetual.

Dr. A. Mack Scott is this year's golf chairman. The tourney is sponsored by the Southern California Veterinary Golf Association.

The tournament is open to all veterinarians, their wives and exhibitors. We hope to see you there.

FIBREPLEX KENNELS

Fibreplex Kennels are superior one-piece molded fibreglass kennels, designed and engineered to the most exacting standards for modern use.

Manufactured from selected resins and fibreglass for maximum strength, durability and utility, yet priced amazingly low.

PLASTIC KENNELS

- Durable — last a life time
- Sanitary & easy to clean
- Beautiful in appearance
- Low priced

DRYING KENNELS

- Efficient.
- Sanitary & easy to clean.
- Safe.

Mr. Tom McKnight, our Veterinary Representative will be at Booth #38 at the California Veterinary Medical Association Convention. We cordially invite all Veterinarians in attendance to visit our display and meet our Representative.

Career Opportunities In Veterinary Medicine

A pamphlet on career opportunities in veterinary medicine is now available through the California Veterinary Medical Association's office in San Francisco or the New York Life Insurance Co.

Dr. I. A. Merchant, dean of the College of Veterinary Medicine, Iowa State University, authored the text for New York Life Insurance Co. as a part of a career series of institutional advertisements.

The company recently ran the advertisement in the Saturday Evening Post and its enthusiastic response caused them to issue it again in booklet form at no cost to veterinarians who might wish to use such material when appearing before local high school graduates seeking career guidance.

The pamphlet "Should You Be A Veterinarian?" can be obtained through the CVMA, AVMA or New York Life Insurance Company, Career Information Service, Box 51, Madison Square Station, New York 10.

Breeder's Choice

The frozen dog foods you can RECOMMEND AND USE with confidence, because, over many years, have been:

- Veterinarian approved and used
- Continuously Kennel Tested
- Laboratory controlled

and are fed to the top Show Dogs in Southern California.

the VICIOUS CIRCLE of
STAPH INFECTION**

STAPHOID A-B®

(THE HIGHLY PURIFIED STANDARDIZED CONCENTRATE OF INACTIVATED STAPH TOXINS AND BACTERIAL CELLS)

Broad Spectrum Protection in Control of Staph Infection

ONLY STAPHOID A-B—is developed from an international collection totaling 101 staph strains isolated from the udders of cows affected with clinical mastitis.^{1, 2}

ONLY STAPHOID A-B—is based on strains of virulent pathogenic staph representing the common phage types which are consistently isolated from cases of staph mastitis.^{3, 4, 5, 6, 7} These strains include Type 42D routinely associated with chronic staph mastitis. Antibiotic-resistant strains are also included in multivalent STAPHOID A-B.

For the first time—broad spectrum STAPHOID A-B provides YOU with a valuable new aid to better control Staph infection in dairy herds.

DOSAGE—Two doses of 5 cc. at a two-week interval. Thereafter, 5 cc. annual booster. In heavily infected herds, the 5 cc. booster is recommended at six-month intervals.

PACKAGING—250 cc. and 50 cc. — 12 bottles per case.

Neoject

AMYLOSE COMPLEX
INJECTABLE IRON

110

TAILOR-MADE FOR SHEEP AND CATTLE

GREATER WEIGHT GAINS AND DISEASE RESISTANCE

Tests showed that Neoject 110 produced significant weight gains in parasitized sheep and cattle. Compared to controls, parasitized cattle, injected with Neoject 110 showed an average of 50 lbs. greater gain in nine weeks, while feeder lambs, injected with Neoject 110, averaged 12 lbs. greater than the controls.

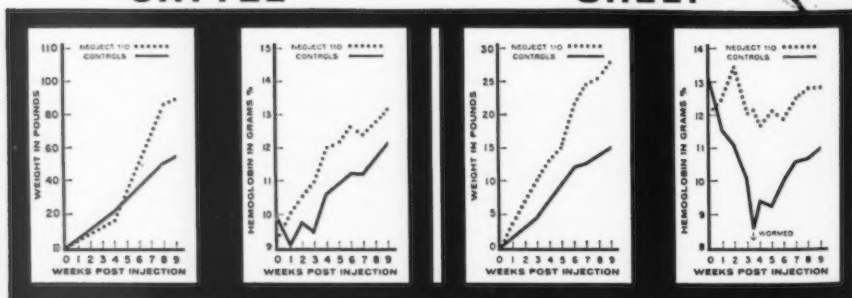

The same tests showed a significant difference in hemoglobin levels at the end of nine weeks in both sheep and cattle (see charts).

WHEN TO USE NEOJECT 110

- A. Dietary iron deficiency
- B. Decreased iron absorption
 1. Achlorhydria
 2. Decreased bile production
 3. Severe diarrhea
- C. Increased demand for iron
 1. Fast growing animals
 2. Pregnant animals
- D. Chronic hemorrhage
 1. Internal and external blood sucking parasites
 2. Chronic hemorrhage of the gastrointestinal tract, uterus, or the urinary system.

Available in 30cc and 100cc vials to veterinarians exclusively.

DIAMOND LABORATORIES
DES MOINES, IOWA

first in progress...through research

Now, you can eliminate
fleas, lice,
and even ticks,
through the unique
systemic action
of

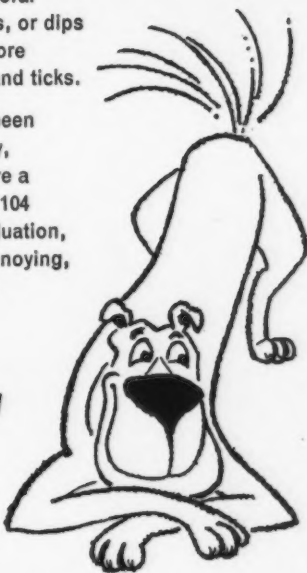

ectoral* tablets

In the eradication of canine ectoparasites, Ectoral Tablets are as economical as sprays, powders, or dips . . . but far more convenient to use, and far more effective for *continuous control* of fleas, lice, and ticks.

The safety and effectiveness of Ectoral have been proved by field tests in all parts of the country, including areas where canine ectoparasites are a major problem to veterinarians. Reports from 104 investigators, during two years of clinical evaluation, show that Ectoral makes the eradication of annoying, dangerous ectoparasites simpler for both the veterinarian and the dog owner.

**And Ectoral is unsurpassed,
practitioners report, as effective therapy
for demodectic mange.**

*Pitman-Moore trademark for ronnel tablets and emulsifiable concentrate. For complete information, a brochure "Abstract of References on Ectoral" is available to veterinarians.
